Tools & Utilities

Axios, Postman, Insomnia, Laravel Sanctum, Inertia.js, vue-i18n, Sentry, Laravel Echo, Husky + Lint-staged, Figma, Vite, Webpack, Chart.js, GSAP

Experience

2009 - 2012

Firewall and penetration testing specialist

I began my career as a firewall and penetration testing specialist, actively participating in various websites and online communities. During this period, I published numerous penetration testing scripts and exploits, with a primary focus on enhancing the security of servers and websites.

2013 - 2021

Software Developer for Various Companies and Projects

Contributed to accounting software 'holoo' with SQL Server optimizations and API updates; transitioned to freelance short-term projects including CMS plugins, custom CMS designs, and WHMCS modules, focusing on web development.

2020 - 2022

Software Developer at Maral Host Web Hosting

Completed three web-focused projects, including CMS development and WHMCS modules; earned an official employer satisfaction certificate.

2022 - 2026

Creator of Personal Laravel-Nuxt Project

I have dedicated over three years to developing my personal, comprehensive project, significantly enhancing my technical and managerial skills. Due to insufficient funding, the project's launch has been delayed.

Testimonials

Client Endorsement, Maral Host - 2022 (Software development)

This is to certify that Farid Teymouri, our contractor, has successfully completed the design and development of the company's websites, including the design of three separate websites, necessary optimization and SEO. Although the project was not easy, he completed it with high quality and earlier than expected.
